

Classio

Material The Classio collection has a wooden base with brass colored frames and the front, sides and tops are covered with so-called “vegan leather”; PU leather (polyurethane) in an animal skin print. The matte brass colored handles and frames are made of galvanized metal.

Maintenance To keep the Classio furniture as beautiful as possible, it is important to maintain the furniture well. For the daily maintenance of the frame, DO NOT use scouring pads and abrasive cleaners as these can leave scratches in metal.

The skin print is best cleaned with a dry or slightly vapor lint-free cloth WITHOUT cleaning detergents.

IMPORTANT: Do not place any heavy objects on the print as this may leave prints. If needed a print can be easily removed by steaming. To do this, place a vapor cloth on the impression and iron it.

This way you will keep your furniture looking beautiful and it will last for a long time.
