

Ironville

Material Ironville is a brass-colored collection with a luxurious look due to its sleek elements combined with the antique brass-colored ribbed motif. The industrial iron bases are painted black and the top of the sideboard is made of real black marble.

Maintenance This collection does not require much maintenance; wiping with a (slightly damp) cloth is sufficient.

Abrasive cleaners are strongly discouraged as they can leave scratches on the brass and base.

Stains can be removed with some water and some natural soap. Do not use cleaning agents with bleaching additives (for example lemon).

Remove stains or spilled liquids directly from the marble top; DO NOT rub spilled liquids, but dab it with kitchen paper or an absorbent cloth.

DO NOT use silicone furniture care products or a solvent such as stain remover, white spirit, benzene, thinner or similar agents.

IMPORTANT: marble is porous; it is best to protect it against stains with a layer of wax. You can also order this wax.

We also recommend using coasters.

In this way you keep your furniture beautiful and enjoy it for a long time.
