

Rostelli

Material Geometric shapes executed in carefully selected and inlaid marble. Marble from local sources and “a touch of Italy”. The craft turns every piece of furniture into a unique work of art. Beautifully framed in black mango wood and on black, refined powder-coated bases. Another part of the collection is based on a black plinth or on 3 black wooden balls.

Maintenance or the metals it is sufficient to wipe with a (slightly damp) cloth.

Under any circumstances do not use cleaning products with abrasives because these can leave scratches in the metal.

Immediately remove stains or spilled liquids from the marble tops; DO NOT rub spilled liquids, but dab them with paper towel or absorbent cloth. DO NOT use silicone-containing furniture care products or a solvent such as stain remover, turpentine, benzene, thinner or similar resources.

Stains can be removed with some water and possibly some natural soap. Do not use cleaning agents with bleaching additives (e.g. lemon).

IMPORTANT: marble is a porous stone type and best to be protected from stains with a thin layer of wax which can also be ordered. Furthermore, we strongly advise using coasters.

The above maintenance advice guarantees a long life for your valuable Rostelli furniture.
